

# Master Programs

## Information and Communication Engineering

This program aims to help students understand electronics and communication engineering technology and their latest development trend. We are equipped with advanced DSP and embedded system developing platform and sophisticated simulation software such as SABER and labVIEW. We also created two additional Labs: The signal detection and process Lab and measure and control technology Lab. These Labs provide an ideal experimental and research environment for the graduate students. Our faculties are mostly committed to signal detection, transmission and processing theories and technologies, as well as petroleum instrument R&D, especially for the weak signals in the strong background noise.

### Program Introduction

## Courses you'll take

Digital Signal Processing  
Image Processing and Recognition  
Stochastic Process  
Oil Well Logging

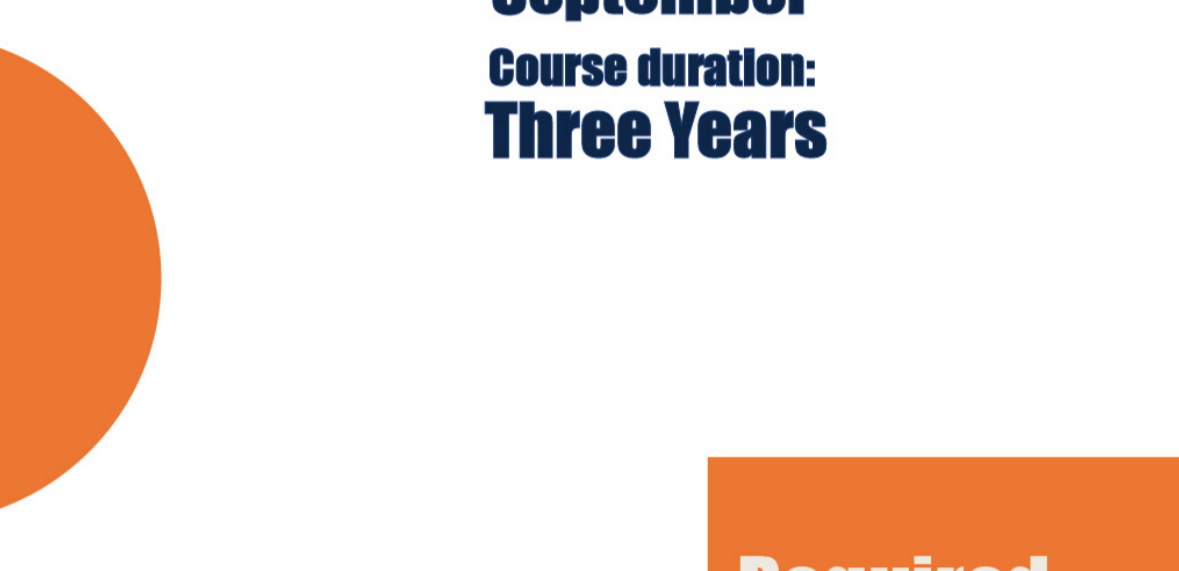

## Research Areas

Signal Detection and Processing

Intelligent Information Processing

Measurement Control Technology and Intelligent Instruments

Oil Field Data Processing and Transmission Technology

Teaching languages:

**Chinese**

Tuition:

**29000 RMB/Year**

Course start date:

**September**

Course duration:

**Three Years**
