

**Proceedings of Sino-Russian ASRTU Forum and
Sino-Russian Ph.D. Students Forum on Ecology and environmental sciences
Instruction for authors**

The conference papers should be provided in electronic form and in a hard copy to the organizing committee at the registration desk on October 21-22, 2020.

A conference paper should have the following elements:

Metadata – title, keywords, abstract, professional affiliation(s) and cited references in the bibliography must be included written in the English Language.

Abstract – a brief and objective summary that previews the rest of the paper it describes (not more than 100 words). Avoid abbreviations, diagrams, and reference to the text.

Introduction – an introductory statement of the purpose of the paper, usually describing the hypothesis that will be tested and a summary of related previous work by others.

Methods – the methods that are used to test the hypothesis should be given in sufficient detail so that another researcher in the field could duplicate the testing.

Results – the hypothesis should be tested and data representing the results of the testing should be presented.

Conclusion – the data should be discussed and the results interpreted, and conclusions given.

All parts of the manuscript should be typewritten, double-spaced, with margins of at least one inch on all sides. Number manuscript pages consecutively throughout the paper. Maximal number of pages is 8.

Illustrations. Illustrations submitted (line drawings, halftones, photos, photomicrographs, etc.) should be clean originals or digital files. Digital files are recommended for highest quality reproduction and should follow these guidelines:

- 300 dpi or higher
- sized to fit on journal page
- EPS, TIFF, or PSD format only
- submitted as separate files, not embedded in text files

Tables and Figures. Tables and figures should not be embedded in the text, but should be included as separate sheets or files. A short descriptive title should appear above each table with a clear legend and any footnotes suitably identified below. All units must be included. Figures should be completely labeled, taking into account necessary size reduction. Captions should be typed, double-spaced, on a separate sheet. All original figures should be clearly marked in pencil on the reverse side with the number, author's name, and top edge indicated.

References. Identify references in the text with Arabic numerals in brackets, and number consecutively in the Reference Section in order of their first mention. References should include: names of all contributing authors (last names first); title of article; title of journal (abbreviate according to the style of Index Medicus) or book; volume number; location and name of publishing company (books only); inclusive pages; year of publication. Examples:

1. *Journal*: Freund PA: Ethical problems in human experimentation. N Engl J Med. 1965; 273: 687-692.
2. *Book*: Hill AB: Statistical methods in clinical and preventative medicine. New York: Oxford University Press; 1962.
3. *Chapter in a Book*: Woolner LB: Recent advances in pulmonary cytology: Early detection and localization of occult lung cancer in symptomless males. In: Koss LG, Coleman DV, eds. Advances in Clinical Cytology. London: Butterworths; 1981: 95-135.
